

*Engineered Aquaculture Solutions*

**FOR IMMEDIATE RELEASE**

## **AEG-JEYCO PARTNERSHIP TO SUPPLY FIRST ENGINEERED MOORING GRID TO ATLANTIC CANADA**

**ST. ANDREWS, NB – 29 FEBRUARY 2008** – Aquaculture Engineering Group Inc. (St. Andrews, NB) announced today that with its partner Jeyco Mooring & Rigging they will deliver all of the rigging required for an engineered mooring grid to be deployed in Atlantic Canada. The mooring grid is scheduled for deployment in Spring 2008.

All required rigging will be supplied by Jeyco including appropriately sized high performance Stingray anchors, Jeyco heavy duty thimbles and Akwaflex rope. The specific rigging was chosen following engineering analysis to calculate the anticipated loads based upon site-specific data supplied by the customer. The deployed grid will be insured by Jeyco for mooring failures as long as the proper inspection and maintenance schedule is maintained.

AEG serves as the distributor of Jeyco mooring equipment, including fully engineered mooring grids, in North America. Deployment of this grid joins more than 20 complete engineered mooring grids deployed by Jeyco globally. In total, more than 6,000 high performance Stingray anchors are now in use globally to moor aquaculture infrastructure.

### **About AEG**

The Aquaculture Engineering Group Inc. provides professionally engineered equipment and management solutions to the marine aquaculture industry, particularly those operations sited in medium- and high-energy environments. *AEG Solutions* must meet five sustainability criteria to ensure our product portfolio is: socially acceptable, cost-effective, eco-friendly, professionally engineered, and robust for survival. Our own line of innovative technologies coupled with those provided through strategic business partnerships allows AEG to supply turn-key systems that meet global client needs. For company details, please visit <http://www.aeg-solutions.com>.

### **About Jeyco**

Jeyco Mooring and Rigging, headquartered in Bibra Lake, Western Australia, is a leading global supplier of mooring and rigging equipment. The company success in the aquaculture sector is largely a result of the performance of the innovative Stingray Anchor. Our philosophy is that mooring grids must be well-designed to account for all of the anticipated forces while remaining cost-effective to the site operator. Jeyco also works with a number of partner companies to deliver turn-key solutions as required including Australian Marine and Offshore Group, Universal Nets and Aquaculture Engineering Group.
